| <b>Length:</b>  |                   | <b>Formula WT:</b> |               |

Measurements to be taken with Muskie laying FLAT on top of a measuring device. A bump type board is preferred. Accuracy is important. Measurement is taken from the tip of the nose to the longest point of the pinched tail. Girth is measured in the net with a soft tape around the Muskie at the largest point from the head to the Dorsal fin. Formulas used to score a Muskie is  $\text{Length} \times \text{Girth} \times \text{Girth} / 800$
